AMENDMENT AFTER ALLOWANCE PURSUANT TO 37 C.F.R. §1.312

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

1. A Notice of Allowance was mailed November 29, 2004, wherein claims i-12 and 26-28 were allowed. Applicant subsequently filed an Amendment After Allowance that was entered on February 18, 2004. This is an additional Amendment After Allowance made pursuant to 37 C.F.R. §1.312.

2. The issue and publication fees are being paid on today's date under separate cover. The formal drawings are being filed on today's date.

3. The purpose of this Amendment After Final is to make the specification consistent with what is shown in the formal drawings. Applicant points out that formal drawings were submitted for FIG. 4 on March 8, 2004, and these formal drawings were designated FIGS. 4a, 4b, and 4c. Applicant now amends the brief description of the specification and specification to reflect this.

In addition, a number of the originally filed figures in this application were enlarged, and now fit on several pages. In particular, originally filed FIG. 1 is now FIGS 1a-1g, originally filed FIG. 2 is now FIGS. 2a and 2b, and originally filed FIG. 4 has, as discussed above, already been amended to become FIGS. 4a-4c. Applicant notes at the outset that although this amendment after final appears lengthy, the amendments are all extremely minor, and none is believe to introduce new matter into the application. For example, the vast majority of the amendments amend FIG. 1 to FIGS. 1a-1g. In addition, applicant does not believe that entry of these amendments would require any substantial amount of additional work on behalf of the United States Patent Office because they are so minor. For the Examiner's convenience, applicant attaches a set of the formal drawings.

4. Please amend the Brief Description of the Figures on the last paragraph of page 9. Please note that the title "Brief Description of the Drawings" was underlined in the application as originally filed. What follows is a replacement paragraph for the brief description of the drawings:

Brief Description of the Drawings

FIGS. 1g shows the apparatus for maximum work diagrammatically or schematically and FIGS. 1a-1f are enlarged views of portions FIG. 1g.

FIGS. 2a and 2b show[[s]] a symbol list detailing the symbols shown in FIGS. 1.

FIG. 3 is graph of the hot water supply and cold water supply temperatures produced by the refrigeration machine for the summer and winter cycles.

FIGS. [[4]] 4a, 4b are [[is]] a graphical representation showing the design conditions, the airside conditions in the winter and summer cycles, and the roomside conditions.

FIG. 4c shows FIGS. 4a and 4b as one figure.

FIG. 5 shows a schematic or diagrammatic view of a layout of a campus or district using the apparatus for maximum work.
